

Scanion Line

Electrophoresis systems

SCANION

Semi automatic densitometer
Reading and calculation of fractions
Edition of fraction minimum
Reading in agarose gel or cellulose acetate strips
with red or black colored stainers

PHEROTANK

Electrophoresis chamber
Reduced size
Capacity: 2 simultaneous cellulose acetate strips
Minimum buffer volume
Includes application kit
Generator included
Constant voltage at work of 200 V

Reagents and Accessories

Cellulose acetate strips
SPE buffer solution
HB buffer solution
HB Hemolysing solution
Red Ponceau stainer
Red Ponceau destainer
Cleaning solution
Glass slides
